KMS

LET'S BELIEVE
LET'S WIN

*KMS was founded in 2007
After over 15 years of
precipitation, we has grown
into the top large-scale service
provider integrating design,
manufacturing and supply as a
whole of professional tactical
gears.*

ADVANTAGE

1st: CONTRACTS

KMS is professional for government tenders and projects, familiar with all standards, will be the strong support for helping you pass the tests and get orders.

2nd: CUSTOMIZATION SERVICE

KMS design team: Dr.IMG has unique R&D skills. Multi - production lines and strong supply chains can satisfy any OEM and ODM needs.

3rd: RTS SERVICE

KMS own a series of independent brand, such as MG FlashForce whose products are top sellers online & offline. Overseas warehouse and drop shipping service also acceptable.

4th: BRAND SUPPORT

KMS are willing to support different partners, even the fresh brand. flexible MOQ, various supplies and creative growing-up solutions are our advantages.

Locates Product Design And
Standards

The design of a combat ballistic helmet should ensure its ease of use together with body armor, ballistic goggles, ballistic goggles, other tactical equipment, gas masks, optical devices with active headlamps or stable headsets, etc. The main name and dimensional characteristics are shown in Table 1.

Size symbol	Head circumference, mm	Weight max., kg
S	Less than 550	1.75
M	550-565	1.85
L	565-585	1.95
XL	585-620	2.05

The helmet includes the following structural elements:
 - protective shell with high weaving of the equivalent type Ops Cloak,
 - energy-absorbing elements,
 - comfort control elements (equivalent to Ops Air Pad Team Wendy),
 - retention system (equivalent to CAMFIT Retention Team Wendy),
 - external mounting / guiding elements located on the protective shell of the helmet and providing attachment of additional devices (night vision devices, lights, headlamps, etc.).
Protective properties:
 The helmet must comply with the 1st protection class according to DSTU (National Standard of

"THREE IN ONE" SERVICE=

CONCEPT

The development cycle of a KMS products begins with the customer's needs and also numerous design and functional and aesthetic possibilities.

DRAFT

After a concept has been selected, the design team drafts a technical package containing working drawings, specifications, construction details and material call-outs.

SAMPLE

Over 15 years bag-maker designer team can use within 48 hours to produce the first sample

JW-100B

FEATURES

- ★ High strength material can withstand bear of loading
- ★ Reasonable compartment for high capacity
- ★ Double zipper puller are more durable
- ★ The buckle can secure the items inside the backpack
- ★ Laser cutting technology can achieve lightweight design
- ★ Back mold pad and chest strap can reduce the weight and impact of the backpack

Material	500D/1000 DNylon 600D/900D/1200D/Polyester
Dimension	20"x14"x12"
Volume	50L
Weight	1.5KG

COLOR

DESIGN + PRODUCTION + TESTING

TEST

The first prototype will be scrutinized and subjected to lab and field testing. Through numerous rounds of revisions over a period of times, the final product takes shape.

AIM

Our designer team—Dr. IMG, our aim is making the creative image into tangible reality
